Welcome

We are truly grateful to consider each and every one of you not just customers, but friends. It is our privilege to provide you with genetics designed to advance your program. As the saying goes, "If you do what you love, you'll never work a day in your life." While we are passionate about what we do—and there are certainly fun days—we also work tirelessly for you. Every crop of cattle reflects our dedication, effort, and commitment. We do the work ourselves; when challenges arise, we dig deeper and push harder, just as you do. The true American cattleman embodies resilience and determination. We believe our cattle are bred to perform and possess the grit needed to push the boundaries of genetic excellence and move your program forward.

This year's offering has come together exceptionally well. Whether you're seeking a baldy, purebred, SimAngus, maternal, or terminal animal, we have something for everyone. To ensure we meet all needs and budgets, we've added 20 additional bulls to our offering. Our cattle are developed on a high-roughage, no-corn diet to promote longevity, fertility, and athleticism. While perfection is our goal, no animal is flawless—but we stand firmly behind every animal we sell. We know our genetics may have brought you here, but it is your trust in our integrity that keeps you returning year after year.

Please make plans to be with us November 13th and 14th. Friday we have a jam-packed day of viewing cattle, fellowship with lunch, and an educational dinner with the best brisket dinner you'll ever eat. Saturday will be sale day starting at 11:00 AM sharp. We will have a loadout crew ready to serve you and load at any time throughout the sale. If you are unable to attend, you are welcome to come view the sale animals at your convenience. We are always available to talk and go over the lots as well on the phone, so don't hesitate to call! This year our sale will be broadcast through DV Auction as well as Superior! We look forward to seeing you soon. Please call us with any questions, as we would love to hear from you.

Thanks,
The Gibbs Farms Crew

- 65 years in the cattle business. Celebrating our 21st fall sale -

Since 1961

PHENOTYPE: The Foundation of Accurate EPDs

In the cattle business, we have more genetic information available to us today than ever before. EPDs, genomics, ultrasound data, and performance records have transformed the way we evaluate cattle. But with all of this technology, one thing remains true: phenotype is the foundation. If we want EPDs to become more accurate and more useful, we have to start with cattle that are measured correctly and perform in the real world.

Phenotype is what we can see, measure, and record on an individual animal. It includes the things that make a cow functional: structure, soundness, body condition, muscle, capacity, fertility, udder quality, feet and legs, growth, and the ability to thrive in the environment where she is expected to work. These observations and measurements are not separate from genetic evaluation—they are the raw information that helps make genetic evaluation better.

EPDs are designed to separate an animal's genetic merit from the environmental factors that influence its performance. That process depends heavily on accurate, consistent data. A birth weight, weaning weight, yearling weight, ultrasound measurement, or carcass record means much more when it comes from a well-managed contemporary group and is collected correctly. The more high-quality phenotypic information that enters the evaluation, the better our ability becomes to identify the genetic differences between animals.

Genomics can add another layer of information and can increase the accuracy of EPDs, especially on young animals with limited progeny data. But genomics do not eliminate the need for phenotype. Genomics can help us predict genetic potential; phenotypic data helps us prove what cattle actually do. The two work together.

This is especially important when selecting for traits that matter in the commercial cow herd. A bull may have impressive numbers on paper, but he still needs to be structurally sound, functional, masculine, fertile, and capable of maintaining himself in the environment where his calves will be produced. Likewise, a replacement female needs more than a set of favorable EPDs. She needs the phenotype to become the kind of cow that can stay productive, breed back, raise a calf, and remain functional for years.

The goal isn't to choose between phenotype and EPDs. The goal is to use phenotype to make our genetic predictions better and then use those predictions to make better breeding decisions. Phenotype tells us what the animal is. EPDs help us understand the genetic component behind what we measure. Genomics can add additional information about the animal's genetic potential. When all three agree, we have a much more complete picture of the animal.

As a seedstock producer, our responsibility is to collect meaningful data, not simply more data. Accurate weights, reproductive records, carcass measurements, structural evaluations, and honest phenotypic observations are what give genetic evaluation its foundation. We invest all the time, effort, and money to ensure the data you see in our catalog is accurate and meaningful. We submit, birth weights, weaning weights, yearling weights, and carcass ultrasound results on each animal. We code CE scores and removal codes as well on the cow herd. The quality of the data we put into the system ultimately affects the confidence commercial cattlemen can have in the information coming out of it.

At the end of the day, great genetics start with a real cow in a real environment. We should never lose sight of the animal standing in front of us while chasing a number on a spreadsheet. Build cattle that look right, function right, perform in their environment, and leave productive offspring. Then use accurate phenotypic data, EPDs, and genomics together to identify and multiply the genetics that consistently get the job done.

Phenotype is the foundation. EPDs add genetic perspective. Genomics add another layer of accuracy. Together, they give us the tools to build better cattle and a more dependable cow herd.

OUR SUCCESS DEPENDS UPON *OUR CUSTOMERS' SUCCESS.*

Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

ACCREDITED GENOMIC PLUS – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward

for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and the they have great EPDs to match!

ACCREDITED TERMINAL MATE – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

ACCREDITED CALVING EASE – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this

genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

Sam Young is leading the way for Gibbs Farms to help you market your calves. Superior Livestock is an excellent marketing program for producers seeking top-end and competitive pricing for their calves. Gibbs Farms is dedicated to help you be more successful.

Marty Ropp is the founder and CEO of Allied Genetic Resources. Marty earned a bachelor's degree at Kansas State University and a master's degree from the University of Missouri. Marty's dedication and determination has led to the advancement of Simmental cattle through his time at American Simmental and Allied Genetic Resources.

Cattlemen's Roundtable Discussion

FRIDAY, November 13 || 6:00 PM

Please plan to join us the evening before the sale for a Country Cook-Out with the whole Gibbs Farms crew, followed by the program that will prove to be interesting, interactive and thought provoking.

DON'T MISS IT!

A Note From The *Sale Manager*

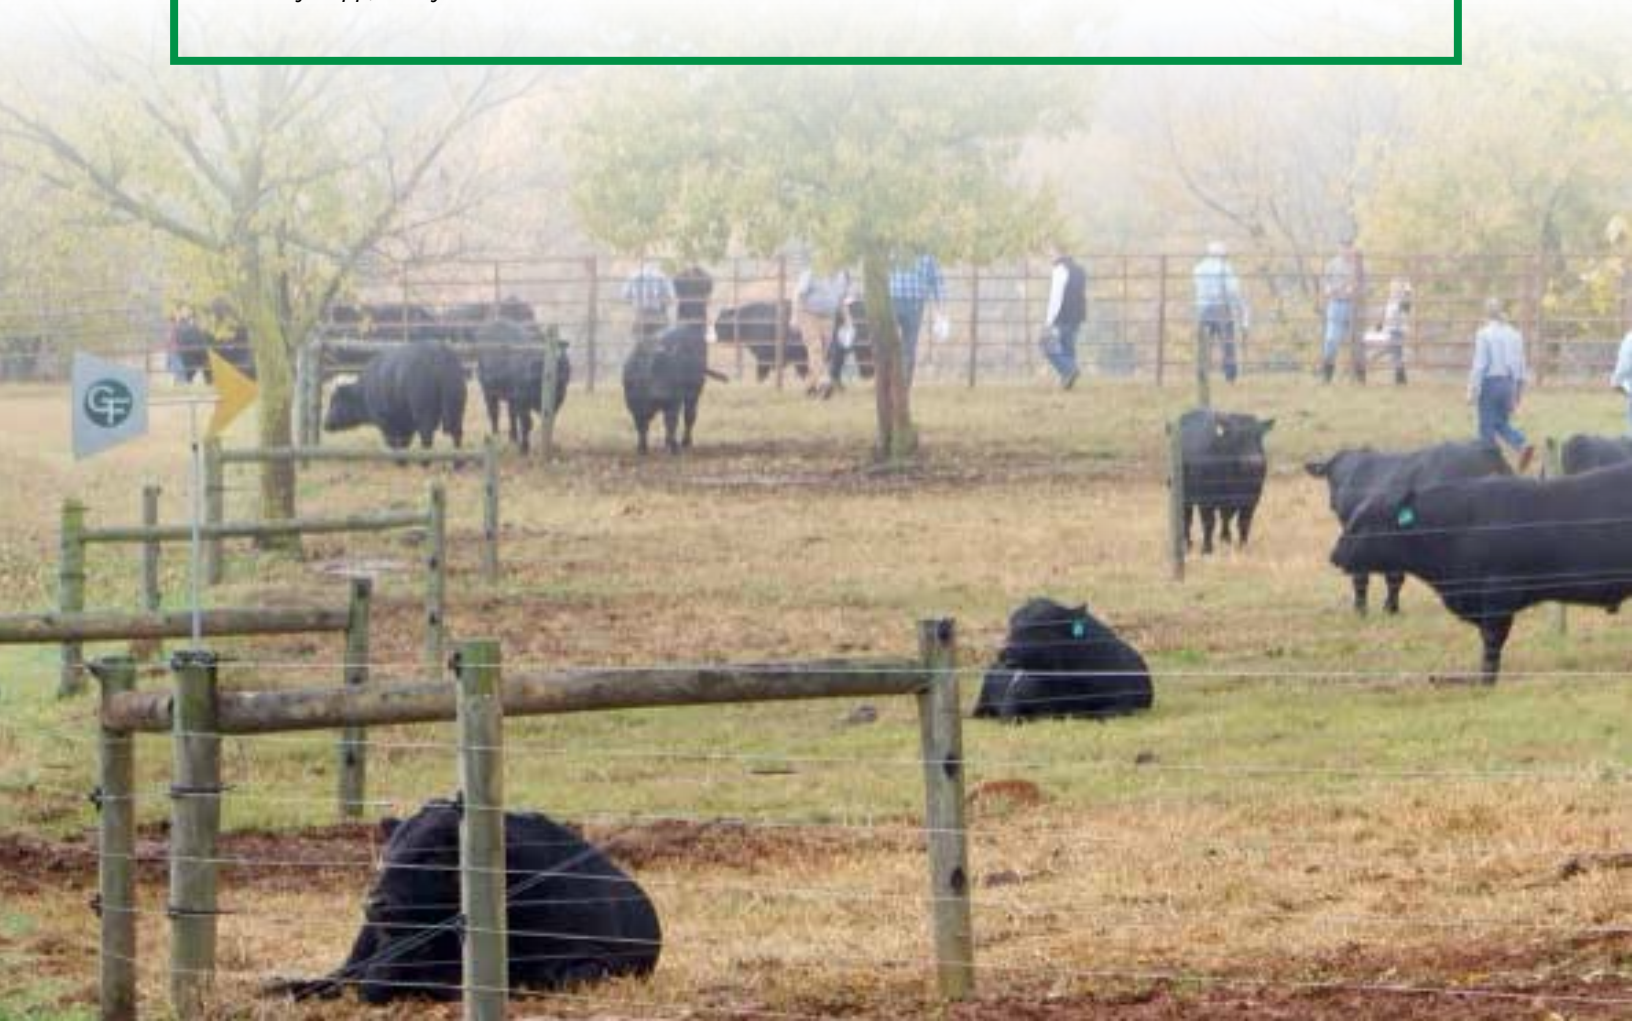

Welcome to the 2026 Gibbs Farms Bull & Replacement Female Sale. Gibbs Farms has become THE venue for performance-focused genetics for commercial and seedstock producers alike. The program is built on generations of precision matings of cattle who will perform at every level of the industry while thriving in the Southeast and the fescue belt. The cattle speak for themselves, but the commitment to customer service is second to none. Every Gibbs Farms customer can count on a strong warranty, affordable delivery, and an expanding commitment to help customers market feeder cattle. We are excited to see their relationship continue to grow with Superior Livestock and believe Sam will be a huge asset to Gibbs Farms' customers.

The 2026 Gibbs Farms sale will mark the largest bull offerings to date. Ramping up the ET and AI program has allowed the quality and quantity of the bulls to grow in order to better meet customer demands. The females purchased from the Gibbs Farm sale always receive rave reviews for their maternal traits and production. We expect more of the same this year and believe the lead of open heifers could be game changers for the seedstock business.

We hope you can make plans to join us on November 14th for the Gibbs Farm Sale. The Gibbs throw an incredible event that will be educational and full of great cattle. As always, if we can be of any assistance, please do not hesitate to reach out.

Sincerely,

Marty Ropp, Corey Wilkins and Jared Murnin

HOW TO PARTICIPATE

1 CREATE AN ACCOUNT

Click "create account" at the top of the page on bid.superiorlivestock.com. Fill out the required information to bid online. Agree to the terms of service and finish with the "register" button.

2 REGISTER FOR A BUYER NUMBER

From the home page or the "all auctions" page, choose the sale you're interested in. Once selected, click the "request a buyer number" button. Verify your email address with the email verification link. To verify your mobile number, click "send token". Follow the steps to authorize your mobile device and click "submit".

3 BID SUCCESSFULLY

You will only have to complete the two-step verification process one time. After that, you will be able to immediately request a buyer number on any auction without verification. If you're a winning bidder, your lots will appear in your cart on the bottom of your screen. You will be contacted by the ranch or sale manager for your payment and shipping plans.

IF YOU NEED HELP REGISTERING TO BID

SimAngus Bulls

• This year's Lot 1 bull is a massively designed Highwayman son that improves upon his sire with frame. He is a true powerhouse bull with exceptional carcass merit and a maternal pedigree that produced last year's high seller, GIBBS ELITE. He combines tremendous muscle and volume with the kind of thickness that gets noticed at every angle. His genetic package is designed to add weight, performance, and carcass traits without sacrificing the kind of functional design needed in a herdsire. Simply put, he's the kind of bull that can stamp power and pounds into a calf crop. On the hoof, this bull is an athlete. He moves with effortless athleticism placing each hoof evenly with a long, smooth stride.

GIBBS 5400N HIGHWAYMAN Sells as Lot 2.

• The Highwayman son most like his sire with his superior phenotype and eye appeal. Moderately made, loaded with muscle and shape, this bull will absolutely grab your eye. This bull offers the functionality needed in a productive herdsire and offers a well-balanced approach to add pounds at weaning rather than frame. This bull's power comes from mass, red meat, and width. He blends style, practicality, and performance, making him an excellent choice to add quality without sacrificing moderation.

GIBBS HIGHWAYMAN 3130L

SIRE OF LOTS 1-4

Thrilled to see the success of the Highwayman progeny. He was a sale feature in 2025 and will cement himself as a leader for genetic progress amongst SimAngus bulls. Not only do his sons study with incredible figures, but they have the type to match it. The bulls are dense, big-ribbed, and come with added performance. He will be a hair-shedding and docility improver.

- Another brother that offers an elite genetic package built with the commercial cattleman in mind. Calving ease, elite growth, and carcass traits highlight this bull as special. He is a unique breeding piece that can fix any trait a cow has. Phenotypically, he is as good as you can make one. Sound, attractive, loaded with body and mass. Most importantly, he is a bull we believe can consistently sire uniform, dependable, marketable calves that perform from pasture to harvest day.

- A complete heifer bull that combines superior phenotype with the genetics package needed to make productive, long-lasting females. He offers outstanding carcass merit, maternal strength, and exceptional hair shedding, making him a versatile tool for both commercial and seedstock programs. We believe this bull's semen sale potential makes him valuable well beyond his first calf crop. A bull built to calve easy, sire attractive females, and add value at every stage of production.

These four ET brothers are backed by the dam of GIBBS CORNERSTONE 3363L. Superior cows make superior bulls, and these brothers are elite. They offer a well-balanced approach to keeping all traits in mind in your genetic selection. Physically, the bedrocks are well-balanced, sound, complete, and superior in their hair shedding. We are currently calving out the first daughters from bedrock, and they are flawless, with excellent udder suspension and teat size.

Bedrock x 9541G Harcrest
FLUSH BROTHERS

SIRE OF LOTS 7-16

Consistency and quality are what we have seen from the Bedrock-sired cattle. He simply does not sire any throwaways. The cattle excel in terms of calving ease and growth, and his genetic profile continues to rise after every calf crop recorded. We feel he will be one of the great SimAngus bulls for commercial use in the years to come. Maternally, we feel he will enhance traits while not sacrificing any growth and terminal premiums.

Gibbs Farms Bulls are grazed on pastures containing KY-31 Fescue and volunteer summer grasses like common Bermuda, crabgrass, and clover very similar to the environment most of them will encounter when they go to work in the environment most southeastern cattlemen operate in. They remain in the large pasture environment from the time they are weaned right up until sale time, never spending anytime in a dry lot environment.

Yes, we supplement the bulls on a high roughage, properly balanced bull developer ration consisting of soyhull pellets, peanut by products pellets, cotton by products, ground hay, a special mineral package and enough extruded cottonseed meal to balance their protein needs. We never use high starch cereal grains in our breeding cattle developer rations.

Placing our breeding stock in settings which will replicate most commercial environments operate in, results in bulls who will absolutely meet your needs. We want customers to be able to recognize their bulls in coming months after the sale.

Gibbs Farms Bull Development

• A true chip off the old block, this kingpin son carries the same body mass and functional build that has made his sire so influential, with even more power and mass. He combines tremendous shape that will translate into pounds and value in the pasture. His sisters are among the very best females we have produced, adding tremendous confidence in his maternal value and ability to build a cowherd around. This is a bull that brings the power to sire marketable calves while keeping the completeness and quality to make outstanding replacement females.

GIBBS 5152N KINGPIN Sells as Lot 18.

• Impeccable weights from an 800 lb weaning weight and 1367 yearling weight. He is the cattleman's kind that grows and thrives on fescue country. The Kingpins come small and grow extremely well, and this bull is no exception. As a group, they are efficient and effective.

GIBBS KINGPIN 1140J

SIRE OF LOTS 17-28

The Kingpin bulls deliver calving-ease-oriented cattle that do not sacrifice growth or terminal traits. The cattle will absolutely work in the south, being great-haired, easy-fleshing, and improvers for docility. Genetically, the bulls offer ample calving ease, explosive growth, and top-tier profit indexes. He has delivered one of our favorite sire groups of bulls and his wet daughters will get you even more excited. The Kingpin cattle are WINNERS!

BREEDING Soundness Exam

EVERY bull in the sale has passed a complete Breeding Soundness Exam performed by our herd veterinarian, Dr. Phillip Wilson of Southland Veterinary Services. Scrotal circumference measurements from the BSE will be made available on the Gibbs Farms website, DVAuction website and at the sale.

SIRE OF LOTS 29-37

Our go-to power SimAngus bull for the last several years. Kenworth has been one of our customers' favorites for years for good reason! The cattle are absolute brutes for mass and density and will sire heavy weight feeders and females who will keep you in business. He is time-tested and once again delivered a first-class offering of sons.

Here is one of our favorites in the entire sale. He's a true beef bull that offers as much muscle and width as the whole sale. He is the natural calf out of an Xceed donor that just gets it done. The Kenworth sire group has been crowd favorites for over five years now, and it's easy to see why. They are a no-nonsense type of cattle. All make marketable bulls, all are sound with great feet, and all are docile. The Kenworths will give you a steer that performs for not only you, but the feeder, and will leave you daughters in your herd that you will be proud of.

GIBBS 5084N KENWORTH Sells as Lot 29.

• A maternal brother to Highwayman, lot 38 has often been called Bradley's favorite bull in the sale. He checks all the boxes from cow family to pedigree to phenotype to performance. This will be the ideal bull to turn out to your cows to improve every trait. He can offer you terminal qualities all while maintaining the maternal characteristics that will keep you in business. Physically we do not think you can make a bull any better.

SIRE OF LOTS 38-46

Haggard was once again a bull we tested in our program after his immense amount of success in the 2025 sale. The cattle are flexible at the ground level, with added body depth, and will be female makers. Terminally Haggard sons provide added growth and breed-leading marbling figures. Here is some new blood for old customers!

• Heifer bull candidate.

JC MS MAYHAYLEY JC109J Maternal grandam of Lot 46.

CARCASS QUALITY Matters

98% of our steers graded Choice or higher.

• The highly anticipated Primal group comes with commanding force. He brings the right combination of power, practicality, phenotype, and performance. No bells and whistles are needed here- just good cattle that get the job done and make dependable, marketable calves. This bull comes from the great STAR cow family that has left their mark here. This large sire group is some of the best we have to offer, as well as in the country.

GIBBS 5221N PRIMAL Sells as Lot 47.

GIBBS 5337N PRIMAL Sells as Lot 48.

• This bull is another great son out of Primal. We feel as if this sire group of bulls offers the consistency needed to prove you are doing things right. Often we believe breeding for balance is just the top 1% in all EPDs, when in fact it's the upper tier of the middle-of-the-road bulls. These bulls don't come too small at birth and don't get too big at maturity; they are just right. Balanced, disciplined approach. Functional cattle that get it done in all aspects of the industry is what we strive to accomplish, and these Primals will do just that.

CCR PRIMAL 8036K

SIRE OF LOTS 47-64

The first progeny of former high-selling Primal is answering the call for added mass and type. The bulls are true performers and offer added growth with tremendous eye appeal. We feel the SimAngus bulls are truly the cattlemen's kind who will deliver value to multiple facets of your operation. Wonderful docility, slick hair, and scale-crushing performance are staples of this great sire group.

CARCASS SELECTION Matters

We have been feeding and receiving carcass records out of our own cattle for over 20 years. Focusing on producing cattle who receives premiums on the rail is a large goal of Gibbs Farms.

TJ STONE COLD 336G

SIRE OF LOTS 65-73

One of the very best baldy bulls in the industry can be found in TJ Stone Cold. The bulls are balanced in every sense of the word. Genetically, the Stone Cold sons display modest birthweights and strong growth figures. Physically, they are level, big-topped, and easy fleshing, and always catch your eye with their striking balance.

Baldies. Added Body. Female Maker

- Heifer bull candidate. Here is your last chance at getting a son of Stone Cold. He has been a crowd favorite here for many years. It's hard to make a great bull, but when you throw in a white face, the gene pool is even tighter. Stone Cold has left his mark here, no pun intended. He is a heifer-safe, calving-ease bull that sires cattle that still perform. Lot 65 is a massive middled bull that is moderate in his stature but still packs a punch in performance. You will be hard-pressed to find a better baldy heifer bull.

Golden Book AWARD RECIPIENT

The Golden Book Award from the American Simmental Association is the association's highest honor, recognizing individuals and families who have made exceptional, long lasting contributions to the Simmental breed and the beef industry.

• This bull is backed by a sire and dam that have already proven their ability to get it done in the real world. He combines the proven foundation with the phenotype, power, and presence to stand out in the pasture and the sale ring. His breed-leading figures add another level of confidence, making him a complete package built to produce high-quality, marketable cattle. He brings performance on paper and the looks to back it up.

FLUSH BROTHERS

SIRE OF LOTS 74-82

Hilltops sons are combining the docility, hair shedding, and soundness of his famous sire Triple Crown while siring cattle with all kinds of performance and growth. The Hilltops will be perfect candidates if you are looking to add payweight to your next set of calves. Likewise, his combination of marbling and REA will sire cattle that garner premiums on the grid. The 0143H flush brothers are some of our favorites in the sale.

Are you selling your calves short?

One of the main reasons I joined the Superior Livestock team as a Sale Representative was simple: I wanted to continue working closely with the Gibbs Farms customers I've gotten to know and respect over the years.

If you're investing in your cow herd by buying quality genetics and putting the right bulls on your cows, your calves deserve to bring a premium. Superior Livestock gives you the opportunity to put those genetics in front of more than 4,500 active buyers.

You've invested in your herd. Now let Superior Livestock help you get paid for that investment.

- Sam Young

DON'T LEAVE MONEY ON THE TABLE. DON'T SELL YOUR CALVES SHORT.

These maternal brothers to Kingpin have so much look, so much length of body, and so much maternal value. The first Fire Power daughters have calved, and we are excited about their future from the maternal side. They will be low-input cattle with high reward on profitability. If you have your cowherd size where you want them and want to improve on efficiency, we encourage you to look at this group of bulls.

This sire group of bulls offers frame, growth, length, and terminal merit. They are built to perform not only at weaning time but also in the feedlot. These bulls love to gain and grow. They will improve performance in your herd as well as carcass traits. They are backed by the 12-year-old donor dam of bareback, which is admired still to this day for her soundness and functionality. There are not many breeders that still have old cows running around, but we still believe in long lasting profitable females that still rise to the top.

WS MISS ALL DAKOTA B208 Dam of Lots 102-105.

FLUSH BROTHERS

BASIN KEYSTONE 2021

SIRE OF LOTS 102-114

We are always searching for some new Angus bloodlines to incorporate into our SimAngus population, and Keystone delivered an excellent set of sons to market in 2026. The bulls are genetically balanced across the board and have absolutely taken off post-weaning. Here are some high-marbling, big-growth bulls who will provide more than enough calving ease.

Power. Marbling. Added Frame

SimAngus Bulls

• Heifer bull candidate. This first-generation SimAngus bull is a standout example of hybrid vigor, combining the best traits of both Simmental and Angus genetics. He is the offspring of a proven, high-quality cow and is sired by one of the top carcass-performing Angus bulls in the industry. This bull exhibits impressive growth, muscle expression, and superior carcass quality, making him an asset to any progressive breeding program. His balanced structure and strong maternal lineage ensure both performance and longevity in his progeny.

• This SimAngus bull's brother stands out for his exceptional EPDs, reflecting his genetic strength and breeding potential. He is particularly valued for his excellent calving ease, making him a dependable choice for heifer matings or situations where low birth weight is essential. With a solid maternal background, he offers the promise of growth and performance without sacrificing ease of management. His breed-leading figures make him a unique breeding piece for all cattlemen.

RSA TRUE BALANCE 1311

SIRE OF LOTS 115-121

True Balance is receiving rave reviews in the Angus population for their maternal and terminal capabilities. The bulls in the sire group are long, big-bodied, and will be some of your favorites by sale time. Here are a sizeable set of sons who absolutely do it all genetically and will no doubt increase value in their progeny.

• The Kenny Rogers cattle were first appreciated for their raw growth, length of body, and muscle mass, but the longer they are around here, the more we appreciate the females in production. These flush brothers are everything we hoped for when we made this mating. They perform, are docile, slick-hided, and have that look we have all come to love.

Here's the "oddball" of the sale. He came from a purchased female from our friends, Cow Camp Ranch. Here's a true spread bull that offers about everything you can ask for in a bull. Loaded with body and mass, soundness, and superior phenotype. This bull offers tremendous genetic value from the calving ease standpoint as well as growth and carcass merit.

Loans for land, farms, and homes.

Most people struggle finding a lender that understands land, home, and farm related financing.

Alabama Farm Credit specializes in financing structured for land, farm, and home loans.

At Alabama Farm Credit we understand your values so you can feel secure in your financing decisions, and focus more on achieving your agribusiness goals and country-living dreams.

AMERICA'S COW

**STAND STRONG
SIMMENTAL**

The **Simmental** cow can handle any environment.

She's built to last in heat, fescue or high altitudes. Thanks to the breed's built-in adaptability, you can match Simmental genetics to your environment; **SimAngus™**, **SimAngus HT**, **Simbrah** or proven Simmental genetics.

Meet America's all-purpose cow with the heterosis boost commercial cattlemen need.

SIMMENTAL.ORG | **406.587.4531**

• Heifer bull candidate. Milestone's maternal brother is certainly going to add to his legacy and create one of his own. Here is a bull that immediately grabs your attention when you walk into the pen. He has so much neck extension and is so clean made through his sheath. We have never seen a purebred bull with this type of look with the mass and substance we all love. This bull is extremely sound and super athletic. When you study him on paper, he is flawless. Adequate birthweight, giant growth, and carcass, and his cow family is pretty special. This bull's pedigree is unique, his type and look are unique, and his EPDs are unique. We feel he is special!

• This bull needs no Dam introduction; 9047G has proven to us yet again how elite her offspring are. Her most notable offspring, Gibbs Culmination, Gibbs Momentum, and Gibbs Prosperity, have proven across the country that her genes are potent. This Breakaway son has the highest EPD profile we have ever raised and is sure to be in many pedigrees to come. This bull combines elite genetic merit, proven performance, and the type of phenotype everyone wants. This bull is moderate-made, efficient, and extremely soft-made. He has as much rib capacity as any bull in the sale. We feel this bull will sire extremely marketable sons and very maternal daughters.

GIBBS 9047G LOUISE Y534 Dam of Lot 130.

TRIF BREAKAWAY 206K

SIRE OF LOTS 128-135

We identified Breakaway as a bull outside of our program to utilize, and his success is undeniable. The sire group should generate both seedstock and commercial interest. The Breakaway sons are leaders in genetic value and have impeccable type and build. His sons by the Hanoi and 9047G donors are some of our favorite purebreds to date. If you are searching for purebred bulls study these sons closely.

Curve Bender. Marbling. Elite API

BALDY

FRAME SCORE

What is the RIGHT ANSWER?

Everyone seems to have a strong opinion one way or the other in what the optimal frame size of a bull should be. First, any seedstock producer would agree frame scores is the most difficult and inaccurate data we collect annually. Cattle not standing perfectly in the chute among other challenges will greatly compromise the accuracy of frame size. Make no mistake, we value growth as much as anyone, but in our eyes growth traits are measured by the scale not by height. Likewise, the correlation between frame size and growth is not as highly correlated as one might suspect.

Ultimately, research shows cattle who fall in the middle in regards to mature frame size are the most productive in terms of weaning off the highest percentage of calf versus their body weight. We are not attempting to sway customers one way or the other, we have bulls in the offering who fall in a wide array of frame size. However, placing a high selection pressure on frame size as it relates to growth might not be the best answers for customers.

• Heifer bull candidate and the lead-off Signature son that is in the top 1% for stay and API. This bull's impressive spread from 65 BW to 703 WW is really impressive. We believe it all starts with a live calf, but they have to grow when they get here. Here is a heifer bull that still has some growth.

We couldn't do it without them.

Left to right: Rob Harms- Head honcho, Mr. Can do it all. Austin Wright- Head Mechanic, Mr. Fit it. Zach Kribs- Head of Nutritional Management, Mr. Care Taker. Daulton Spruill- Head of Strategic Hauling, Mr. I'll get it there. Ryan Mitchell- Head of Land Management, Mr. Keeping things Looking Right.

RFS ROLL CALL

SIRE OF LOTS 146-151

Roll Call was a herd bull we purchased in partnership with ST Genetics. The cattle are no-holes across the board and stem back to a highly prolific cow family for the Rydeen and Wilkinson families. The bulls are great to study physically and provided balanced figures. Here is a sire group that has the type to thrive for Southeasten cattlemen.

Need Semen?

Check out the Gibbs Farms Semen Guide

Visit gibbsfarms.net to view our semen guide. We have assembled some of the most progressive bulls in the breed for AI use.

Scan the QR Code to view the semen guide.

Herd Health... Every sale animal and the entire Gibbs Farms breeding herd is properly vaccinated and boosted annually for 7-Way Clostridium, IBR-BVD-BRSV-PI3, Hamophilus Somnus, Pasturella, Leptospirosis, and Vibriosis. All heifers are calfhood vaccinated for Brucellosis and every calf born on the farm each year is tested for BVD-PI. All sale animals have been tested negative for Johne's Disease and the cow herd is being tested annually. All animals on the farm are treated at least twice annually with a parasitic pour-on and at least once annually with Safe-Guard drench. All bulls have successfully passed a complete breeding soundness exam.

Guarantee on the Open Heifers...

Every open heifer is guaranteed open at the time of the sale and is guaranteed to be a breeder as long as the female has been exposed to proper nutrition and management. In the event of a non-breeder, please contact us, and sale credit will be issued minus salvage value.

Guarantee on the Bred Females... Every bred female is guaranteed to be bred at the time as stated in the catalog, unless updated by the auctioneer. In the case of an open female, please contact Gibbs Farms immediately.

Guarantee on the Sale Bulls... Every bull has successfully passed a breeding soundness exam prior to the sale and is guaranteed breeders. Our warranty for the bulls includes semen and feet issues (not stemming from injury or management). All other injuries such as broke penis, acts of God, and situations related to management that are beyond our control, will not be covered. A veterinary inspection/report is required for warranty claims.

Genetic Conditions... The knowledge and testing technology for all types of genetic conditions is almost changing daily. What we knew to be policy yesterday may be obsolete today. Our policy at Gibbs Farms is to fully follow and abide by any and all testing and reporting policy pertaining to genetic conditions as recommended by the American Simmental Association. We further state that our personal policy is to not market any animals known to be carriers or suspected of being carriers of any genetic conditions classified by the ASA as lethal and/or high occurrence. On any animals known to be carriers of other non-lethal genetic conditions that the ASA recommends testing, we will test and provide results on any animals marketed. For full disclosure and explanation of all genetic conditions monitored by the ASA, please refer to the TraitTrac shown on their individual pedigree on the ASA website.

We understand the investment you make in your bulls can be significant; we will make every effort to take care of you if something goes awry. All bulls purchased sight unseen or online carry a 100% satisfaction guarantee.

**NO ONE CAN GUARANTEE EVERY ANIMAL WILL
PERFORM PERFECTLY,
BUT AT GIBBS FARMS WE GUARANTEE
WE WILL MAKE THINGS RIGHT IF THEY DO NOT!**

• The lead-off Enhancement out of Essential's dam is exactly what we hoped to get from this proven mating. Consistent, powerful, slick-haired bulls that have superior phenotype and flat-out get the job done. This band of brothers is a result of some of our most proven genetics we have. Elite, dependable genetics that are proven for success. The baldies are just a plus.

GIBBS PROSPERITY 3125L

SIRE OF LOTS 175-184

The Prosperity sons are dense, powerful and the cattlemen's kind. We love the cookie-cutter consistency in the bulls and are very confident they will be well received on sale day. Look for the Prosperity sons to add value across the board and be a heavy-use sire in our program moving forward.

- Prosperity is a bull that we have utilized to offer outcross pedigrees and boost our maternal characteristics. He is a moderate-framed bull that combines tremendous thickness, muscle, and natural fleshing ability with the maternal value to build a productive cow herd. He offers the kind of functional design and body shape that should translate into efficient daughters and marketable calves. He is a practical, easy-keeping bull built to work for the commercial cattlemen. This bull's dam is a current donor cow that raised a \$20,000 Essential son last year.

- A truly impressive baldy bull that brings the kind of outcross pedigree, phenotype, and balance that is hard to find. He is perfectly made, sound from the ground up, and offers a complete package with no holes. These are the kind of cattle we need to be breeding more of - they are functional, attractive, productive cattle that can make a lasting impact of a herd.

KBHR SCREENSHOT K167

SIRE OF LOTS 195-199

High valued big-performing baldy genetics are the traits we love about the Screenshot cattle. The bulls will supply added muscle shape and enhance terminal traits of their market-bound progeny. If you are looking for more pounds and more carcass traits, look no further than the Screenshot sons.

Powerhouse. Muscle. Mass

Matthew Grogan *AI and Ultrasound Technician*

We would like to thank Matthew Grogan from Calhoun, Georgia for his many years of dedicated service. Matthew assist us with AI during breeding season and then performs the ultrasound pregnancy exams for all of our cow herd, replacement females, and sale females.

ASA QUICK REFERENCE TO EPDS, INDEXES AND \$VALUES

EXPECTED PROGENY DIFFERENCES (EPDS): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmmental.org.

Listed below are the units in which ASA EPDs are expressed:

ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario.

BACK FAT (BF): Inches of carcass backfat at 475 days.

BIRTH WEIGHT (BW): Pounds of birth weight.

CALVING EASE (CE): Percent of unassisted births when used on heifers.

CARCASS WEIGHT (CW): Pounds of carcass weight at 475 days.

DOCILITY (DOC): Percent of offspring receiving a disposition score of 1 (docile).

MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.

MILK (MLK): Pounds of weaning weight due to milk.

MARBLING (MARB): Carcass marbling score at 475 days.

MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.

RIBEYE AREA (REA): Square inches of carcass ribeye at 475 days.

TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario.

WEANING WEIGHT (WW): Pounds of weaning weight.

YEARLING WEIGHT (YW): Pounds of yearling weight.

YIELD GRADE (YG): Carcass yield grade score at 475 days.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

ALL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

For more detailed information about EPDs and \$indexes, visit: www.simmmental.org

- Sells open.
- Wow, what a genetic piece. Purebred genetics that are outcross with elite phenotype and cow families are hard to find. We believe this female is the best Purebred to sell this year. This is the type of heifer you can build a program around. Honestly, it hurts to let this one go. We give Corey free will to pick our best purebred, baldy, and SimAngus every year and here they are. This female is out of Milestones Dam, and she is a full sibling to Lot 128. Hanoi, her dam, has already sold a bred heifer in our fall sale for \$28,000.

BGIBBS 2392K HANOI CLRS0110H Dam of Lot 306.

- Sells open.
- This Highwayman daughter is a looker! She excels in body and mass and reads as elite. This female is our best we have from our SimAngus division, and it's easy to see why. This is the type of female that gets your attention from the ground up-attractive, deep-made, and exceptionally well-balanced. She combines the phenotype and maternal look we demand with the pedigree that makes her valuable for the future. A complete no-holes female that represents the kind we need more of!

BALDY

- Sells open.
- A powerful baldy open heifer that combines an exciting outcross pedigree with tremendous depth, softness, and natural dimension. She is bold in her rib, deep-bodied, and carries the kind of substance that should translate into a productive brood cow. A unique female with the look, power, and pedigree to make her a valuable piece of the future cow herd. All three of these heifers deserve some embryo work. Propagate your best, and these are ours!

SCHOOLEY HAGGARD A411H Sire of Lot 308.

• Mainstay was the high seller from Schooley Cattle Company and English Oaks Ranch, purchased by us and River Creek Farms in Kansas. Mainstay displays to be a curve-bending bull that excels in performance, phenotype, and carcass merit – all wrapped up in a blazed face package. The first Mainstay calves are on the ground, and boy are they powerful. We love them! He puts as much white on the face as any bull we have ever used.

• Milestone saw heavy use in our herd last year. His first calves look outstanding. They came with very modest birth weights, and we believe he is suitable for heifers. Milestone is the solid black purebred Culmination son that has a tremendous look with neck extension and added hip with excellent feet. We feel Milestone we get extremely popular in the future. Do not miss the opportunity to get semen on him. This will be the LAST semen we market on him in 2026.
